

THE HUMAN WORLD

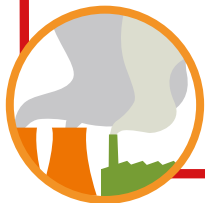

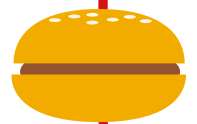

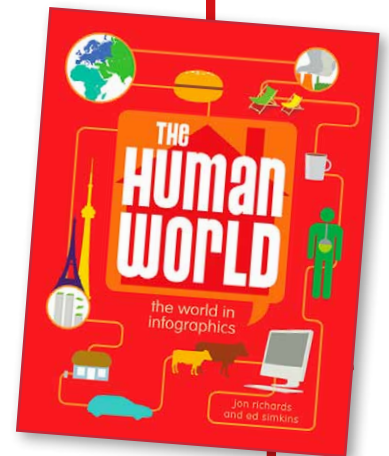

Teacher Resource for Classrooms 3-6

The World in Infographics series welcomes readers to an exciting form of data visualization.

Each title uses icons, pictograms, and graphics to present stats, facts and figures through beautifully designed infographics. Highly visual and accessible, the series helps children digest complex information, covering a wide range of topics along the way. Each book includes an index, a glossary, and a resource list at the back, creating a package for 8- to 12-year-olds that inspires learning.

In *The Human World*, your students will discover how many passengers there are for each car in the world, learn how to measure the world's largest grocery store in soccer fields, visualize how much food is thrown away every single day, and more!
